

Awareness Between Caregiver Visits Without Replacing Caregivers

What This Is

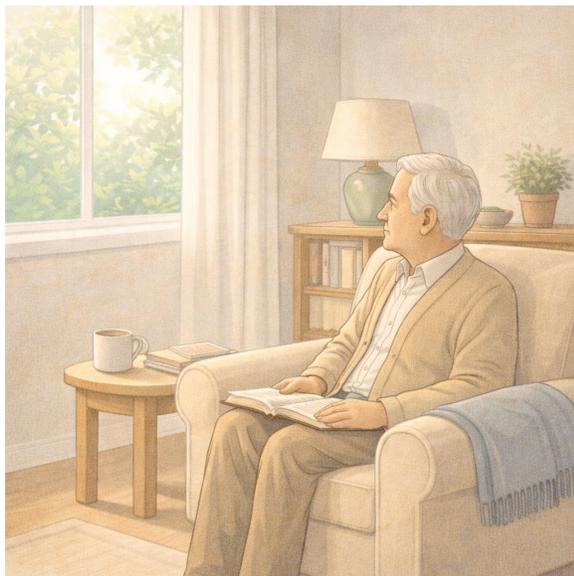

This document explains a complementary awareness option (Alerta Home) for families using private-pay care.

Home care providers often want visibility between scheduled visits or support families who want the same.

Alerta Home is a passive awareness system that detects meaningful changes in daily movement or activities, without cameras, recorders, or wearables.

Who This Is For

- Families receiving part-time in-home care.
- Families seeking reassurance outside visit hours.
- Families who value privacy and dignity.
- Families not seeking 24/7 supervision.

When Families Typically Consider This

- Between caregiver visits.
- Overnight or on weekends.
- Before increasing care hours.
- While assessing future needs.

What This Is Not

- Replacement for caregivers.
- Caregiver performance monitor.
- Emergency response provider.
- Care recipient tracker in real-time.
- Alerta Home is intended to complement human care, not replace professional judgment or presence.
